Bhavnagar INDIA

HI ,I am INDIAN Gujarati IT professional looking for hourly work or projects , having hope that I will be helpful for faraway organizations or people is what excites me

I am confident that I will have grate opportunity to help and work in organization or company located at California,USA ,Finland .Netherland or South Korea.

## Where I can help

- Hosting environments
- Linux server Maintenance
- Firewall setups
- Virtualization environments (Oracle VM, Hyper-v, Proxmox)
- Scripting and coding PHP, python java bash or as per project requirement
- Automation and IOT services
- Different kind of servers Email servers , Git servers , Hosting panels, Database servers
- Virtualization server Install, Maintain , Backup Restore.

- All kind of DNS managements MX, AAAA, CNAME, reverse DNS, DKIM, SFP etc...etc.. records

## What can I do for organization

- Setting up websites hosting LAMP stack with SSL security
- Install , Manage , Migrate Hosting management panels C-Panel , ispconfig etc..etc..
- Manage code in git or github or gitlab like environment ci-cd , Including self hosing likes Gitea , Gogs
- Get , Update or Set data via Rest APIs or Json Data via different different technologies like Php , Java , Python on various types of database like MySQL, maria db , Graph ql and secure it with auth token like Json ( authentication and authorization )
- have knowledge fo Domain , MX , SFP , DKIM and DNS servers for both public and private networks
- Know firewall setups including but not limited to forward rules , Allow , Blocks , IP rate limits ,Internal and External network Exposition, private VPN servers (to secure services ,only vpn users can access services ) , Securing ports with ssl and forwarding , hosting multiple domain over single ipv4/ipv6
- Hosting , securing , upgrade , maintain and backup private mail servers with large user base • setup own CDN network using multiple computer network either private server or using other service provider like akamai , cloud flare or other third party
- Setup and use Object storage storage servers use in app or via API
- Local virtual environments like hyper-v , oracle , proxmox install , manage , backup and maintain

- Automation task like email reply or API response
- IOT solutions
